REC\_DS using C\_Week 2\_COD\_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

## 1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

**Input Format** 

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

#### **Output Format**

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

### Sample Test Case

Input: a b c -

```
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
Char item;
  struct Node* next;
  struct Node* prev;
// You are using GCC
void insertAtEnd(struct Node** head, char item) {
  struct Node* newnode=(struct Node*)malloc(sizeof(struct Node));
  newnode->item=item:
  newnode->next=NULL;
  newnode->prev=NULL;
  if(*head==NULL) *head=newnode;
  else{
struct Node*temp=*head;
  while(temp->next){
```

```
temp=temp->next;
         temp->next=newnode;
         newnode->prev=temp;}
        //type your code here
      void displayForward(struct Node* head) {
         struct Node*temp=head;
           while(temp){
             printf("%c ",temp->item);
             temp=temp->next;
           printf("\n");
         //type your code here __
      void displayBackward(struct Node* tail) {
         struct Node*temp=tail;
           while(temp){
             printf("%c ",temp->item);
             temp=temp->prev;
         }
         printf("\n");
         //type your code here
      void freePlaylist(struct Node* head) {
         struct Node*temp;
         while(head){
           temp=head;
           head=head->next;
           free(temp);
         }
         //type your code here
        struct Node* playlist = NULL;
char item;
      int main() {
char item;
```
